

Financial Support for Learning Evaluations

According to the National Board of Medical Educators (NBME), documentation of a student learning evaluation must be within three years of the application date to be considered for an accommodation on a USMLE exam. Current students may request funds for a psychoeducational or psychosocial re-evaluation if the re-evaluation is needed to apply for accommodations on the USMLE Step 1, USMLE Step 2 CK, or USMLE Step 2 CS exam. To qualify for funding from the Office of Academic Success (OAS), the student must be currently receiving accommodations at the medical school and be working with the OAS to complete the Application for Accommodations through the NBME. The student must not have had a similar evaluation within the last three years and must show a demonstrated financial need as defined by the Office of Student Finance. If you meet the criteria listed, please make an appointment with OAS.

Additionally, a learning evaluation may be recommended if a student has earned a DNM in any two courses (not inclusive of CPR) in an academic year. If the OAS recommends a learning evaluation under these circumstances, financial support will be given.
