individuals with dementia and their care partners*

Arts  Minds
connecting art & well-being

Experience how music and art can tap into cognition, emotion, and memory, enabling dementia patients to express themselves creatively despite their cognitive struggles with memory and words. Music and art may help participants to reclaim their sense of self and to interact with their loved ones and the community in a meaningful and enjoyable way.

Friday, April 27, 2018
5 p.m.

W165 Lounge
Zucker School of Medicine

Refreshments will be served.
