Why Doctors Write: Finding Humanity in Medicine is a film about the intersection of medicine and literature which guides viewers into areas of the medical world where creative writing and reflective reading are transforming doctors, medical students, and other healthcare workers. This growing movement of writing by doctors, and use of literature in hospitals and medical schools, is renewing humanism in medicine at a time when technology, managed care, and other constraints encroach upon the doctor-patient connection. All are welcome to attend. Film trailer: <https://www.kbprods.com/portfolio/why-doctors-write/>
