Multi Purpose Room Laptop Connection

1) Connect your laptop to the wallplate using a VGA or HDMI cable.

2) If the wall control panel is dark, touch the screen to turn it on.

3) Press the “AUX” button

4) Press Laptop VGA or HDMI to select which cable you are using.

5) If your image doesn't appear on the classroom monitor, press the Function (Fn) and F7 keys on your laptop simultaneously.

Note- You may need an adapter to connect your Mac laptop to the display.
