Updates on new services and tips for efficient access to all library resources

March 2018

New Website

Check out the newly updated School of Medicine **Library website**!

New Resources

BrowZine

BrowZine is an app that allows you to browse, read, and keep track of your favorite journals from your Apple or Android device!

You can create a customized bookshelf of journals, browse table of contents as new issues are published, access the full text of articles to which Northwell Health and the Zucker School of Medicine subscribes plus any open access articles, and save articles in a centralized location.

Northwell Users

Northwell Health utilizes the BrowZine Pairing Service to enable off-campus access for any iOS or Android device. To learn how to setup the BrowZine Pairing Service, click **here**. Choose *Northwell Health* as your institution. We recommend using your *northwell.edu* email for your account.

School of Medicine Users

If you only have Hofstra credentials, please select *Zucker School of Medicine at Hofstra/Northwell* as your institution. Click **here** for instructions.

OMMBID is an essential digital reference tool that provides comprehensive coverage of genes and genetic mechanisms underlying human disease states.

Click **here** to access OMMBID from the SOM library or **here** to access from a Northwell Health campus.

IEEE Xplore provides full text access to journals, conference proceedings, standards, and transactions in the fields of electrical engineering, biomedical engineering, electronics, and computer science.

Click **here** to access IEEE Xplore from the SOM library or **here** to access from a Northwell Health campus.

Featured Resource

The Case Files Collection on the AccessMedicine platform is a comprehensive collection of basic science, clinical rotation, and post-graduate cases. The content is in an interactive format allowing users to learn and retain knowledge through realistic patient cases. The platform has a personalization functionality (free MyAccess account required) that allows users to mark their progress through completed and unseen cases.

Click **here** to access the Case Files Collection from the SOM library or **here** to access from a Northwell Health campus.

Questions or Comments?

If you have any inquiries about library resources,
please contact Wendy Herman, Head of Education and Access Services.
