Library

February 2017

Updates on new services and tips for efficient access to all library resources

DynaMed Plus

Try out the new point-of-care resource!

This new product provides a user friendly interface, over 4,500 images, overviews and recommendations, and Micromedex integration. A mobile app is available. The references link to our journal holdings.

Click here to access DynaMed Plus from the SOM Library or here to access from EMIL.

EndNote™ X8

The desktop version of EndNote X8 is now available to download

Access the EndNote LibGuide for additional information.

PubMed

Seeking full-text articles from PubMed?

Be sure to use one of the PubMed links available on either the SOM library website or EMIL.

In order to access full-text directly from PubMed, you must use one of these designated URLs that link to our holdings.

Can't get full-text access from PubMed?

Try searching for the journal title in the *Journal and eBook Finder* from the SOM library or EMIL.

When accessing full-text articles from PubMed, you may encounter the following screen:

Select a Wolters Kluwer Source
The article you have selected is available through multiple Wolters Kluwer sources.

Select your preferred full-text source by clicking one of the buttons below:

OvidSP
eduserv athens

Lippincott
Williams & Wilkins

Institutional subscribers and Athens users can access their full-text articles by clicking the OvidSP & Athens button below:

Society and individual subscribers can access their full-text articles by clicking the LWW Journals button below:

OvidSP & Athens ▸▸

LWW Journals ▸▸

☐ Remember this selection in the future

When given this choice, always select *OvidSP*.

Introducing

Hofstra Northwell Academic Works

[Hofstra Northwell Academic Works](#) is a digital repository created to showcase the scholarly output of the School of Medicine and Northwell Health, including full text access to most materials.

The repository has the potential to expand to include not only articles but books/chapters, abstracts, posters, presentations, and videos. There is currently a seed collection with works from 12 departments online with more being added on a continuous basis.

Any questions about the repository should be directed to academicworks@hofstra.edu.

Faculty Profiles

SELECTEDWORKS™

As part of the digital repository, the library will be maintaining personal profiles for each SOM faculty member. These profiles will also act as a directory for the new SOM website. **Once we make the profiles live, you will receive an email alerting you of this and asking you to claim your account. Please follow the instructions in the email. You are not required to take any action besides claiming your account.** To avoid making extra work for you, the library has filled out your basic information and will keep your profile updated, including adding your publications to your profile as they get uploaded to the repository. Questions? Please see our [FAQ](#).
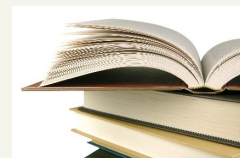

Institutional access to ORCID is now implemented!

ORCID is a permanent unique identifier for researchers and authors. This online tool aims to solve the name ambiguity problem in research and scholarly communications.

Instructions on how to register, connect, and manage your ORCID profile can be found on the ORCID LibGuide.

For additional questions and instructions, please contact Leanna Stager.

Have you written a book chapter or a book?

The Health Sciences Library's Faculty Author Collection displays books authored by Northwell Health and Hofstra Northwell SOM faculty.

Contact Wendy Herman for further information on displaying your work!

Personal Accounts for the LWWHealth Library

The LWWHealth Library platform recently rolled out a personal account feature to allow users to personalize their experience. In order to print or save a chapter to PDF, users must register and sign in with a personal account.

To register, visit the LWWHealth Library from the SOM library website.

Please note that the LWWHealth Library is only available through the SOM Library website.

Click here to access the latest content updates from ClinicalKey

You must be on either the Northwell Health campus or the SOM to access the full-text links provided on the Content Updates page.

Questions or Comments?

If you have any inquiries about library resources,
please contact Wendy Herman, Head of Education and Access Services.
